Over the last 45 years, K&N® has cemented its place within the performance aftermarket industry. K&N® prides itself in its strong ties with multiple race series, dozens of shows, as well as hundreds of sponsored top racers and test riders. Across the United States, and abroad, K&N's commitment to quality and performance is exemplified day in and day out as K&N® products are proven in real world conditions. Come see first-hand how K&N® filtration products can benefit you and your vehicle at any one of the hundreds of shows and events listed on our website at:

# K&N® IN 1969

## WHERE IT ALL BEGAN

Ken Johnson and Norm McDonald make up the “K” and the “N” in K&N®. Ken and Norm were avid motorcycle racers who entered the aftermarket in the 1960’s with a line of motorcycle handlebars. While promoting their handlebars, Ken and Norm began experimenting with different air filter designs to combat the frustrations of the air filter technology of the day.

The problem dirt riders encountered with the paper filters used was that dirt would build up on the paper and block the flow of air to the carburetor. In addition, these paper filters were nearly impossible to clean and would usually have to be discarded after every race.

The most successful design they found consisted of layers of cotton gauze sandwiched between wire mesh. Unlike dry paper elements, they coated the cotton media with oil to act as a tacking agent to help trap dirt particles. This new technology allowed air to pass through, while still capturing dirt particles that could harm their engines.

In 1969 K&N® began production of oiled cotton gauze air filters and The World’s Best Air Filter™ was born.

## THE PERFORMANCE AIR FILTER STANDARD

K&N® Truck and Trailer

As the originator and world leader of performance air filters, it is important to also be a leader in testing air filtration products. K&N® strives to provide a proven filtration system through our in-house test facilities. We believe our filter media provides the proper balance of airflow, protection and durability. We have advanced testing facilities that include filtration test labs, dynamometers, flowbenches, a MAF sensor test system, and many other testing machines. We put our products through extensive testing to ensure they are worthy of the name K&N®.

K&N® also employs a full staff of engineers and product designers working with the latest computer software to engineer every air filter and intake system we make. We even design and build most of the tooling and much of the machinery used to manufacture K&N® High-Flow Air Filters. With three machine shops on site, K&N® employs advanced equipment and machinery to ensure that our products are built to last. When you buy a K&N®, you can be certain we use everything we have learned to make sure our products perform their very best.

# **HIGH-FLOW AIR FILTERS™**

## **DESIGNED TO INCREASE HORSEPOWER**

K&N® delivers the same high-flow technology in every filter we manufacture. Headquartered in Riverside, California, K&N® Engineering, Inc. has been the world leader in performance filter technology since 1969. Creating a high-flow, washable and reusable air filter put K&N® on the map.

- *Designed to provide low restriction resulting in increased airflow and high performance*
- *Pleated media provides a large filtration area offering long service intervals*
- *Most are pre-oiled and ready to ride*

**1**

Oiled premium cotton gauze helps maintain high airflow and excellent filtration

- Thousands of microscopic cotton threads absorb special air filter oil, creating a powerful filter media
- Pleated design provides a large surface area for high dirt capacity and long service intervals
- Epoxy coated aluminum screen mesh protects filter media

**2**

OE style mounting tabs *(where applicable)*

**3**

One-piece seamless sealing bead ensures a precise fit

- Custom molded, application-specific air filter frame allows for easy installation *(where applicable)*

K&N® High-Flow Cotton Air Filter

Common OE Paper Air Filter

# WRENCH-OFF® OIL FILTERS

## HIGH-FLOW PERFORMANCE FILTER MEDIA

K&N® delivers a premium oil filter built to withstand the high demands of racing conditions. Our oil filters are designed with a high-flow synthetic media that is engineered to provide high flow rates and outstanding filtration. They are ideal for use with premium synthetic and traditional oils. In order to ease maintenance, a 17mm nut has been welded to the top to allow for easy removal, especially in tight, hard to reach spaces. A heavy duty canister provides a high-burst strength while also adding extra protection from debris and rocks in off-road environments. K&N® oil filters deliver performance and confidence!

- Specially designed for today's synthetic and extended service motor oils
- Sturdy 17mm hex nut eases removal in hard to reach areas
- Ideal for hard to reach oil filters, do-it-yourself oil changes, high performance engines, and track or race applications
- K&N® limited warranty

Use of a K&N Performance Oil Filter will NOT void factory warranty.

**CARTRIDGE-STYLE OIL FILTERS ALSO AVAILABLE**

**17MM WRENCH NUT EASES REMOVAL\***

**SYNTHETIC MEDIA FOR HIGH FLOW RATES**

**PRE-DRILLED FOR SAFETY WIRE ATTACHMENT\***

**PRE-LUBED BASE SEAL FOR QUICK INSTALLATION\***

**KN-171C INSTALLED**

**KN-170 REMOVAL**

\*Where applicable

- 1** Welded 17mm hex nut for easy wrench-off® removal\*
  - Pre-drilled for safety-wire attachment during racing
- 2** Heavy duty canister construction provides a high burst strength and extra protection from debris and rocks in off-road conditions
  - Most available in black or chrome finish
- 3** Tension spring
- 4** Part number specific bypass/pressure relief valve\*
- 5** Specially designed to be compatible with premium synthetic, blended and traditional motor oils
  - Premium synthetic media provides outstanding filtration while allowing for high-flow rates
- 6** Anti-drainback valve prevents dry starts\*
- 7** Heavy duty baseplate with leakproof double-rolled seal
- 8** Pre-lubed base seal or gasket\* for easy no-mess installation

\*Where applicable

Common Cellulose OE Replacement

# **AMERICAN V-TWIN**

## HIGH-FLOW AIR FILTERS™

- The original High-Flow Air Filter™ invented by K&N®
- Designed to provide low restriction, resulting in increased airflow and high performance
- Pleated media provides a large filtration area, delivering high capacity and long service intervals
- Specifically designed to fit into your OE air filter assembly
- Pre-oiled and ready to ride

## PERFORMANCE INTAKE SYSTEMS†

- Guaranteed to increase horsepower
- Better engine sound and power you can feel
- Replaces OE air filter assembly
- Multiple styles to choose from
- Developed around an oversized K&N® High-Flow Air Filter™
- 10-year/million mile limited warranty

WASHABLE  
REUSABLE

## WRENCH-OFF® OIL FILTERS

- Specially designed to be compatible with synthetic, blended and traditional motor oils
- Premium synthetic media provides outstanding filtration and high-flow rates
- Sturdy 17mm hex nut eases removal in hard to reach areas
- Heavy duty canister provides a high burst strength and extra protection
- Most Available in Black or Chrome Finish
- One-Year Limited Warranty

# AIRCHARGER® INTAKE SYSTEMS\* FOR AMERICAN V-TWINS

Custom built in the USA, providing an aggressive appearance and an increase in horsepower that you can feel!

- *Guaranteed to increase horsepower*
- *Custom aluminum throttle-body mounting plate*
- *Mandrel-bent high-flow aluminum intake tube*
- *Includes complete breather assembly and mounting hardware*
- *Available in bright mirror or textured black finish*
- *K&N® High-Flow Air Filter™ designed to increase performance*
- *10-year/million mile limited warranty*

Aircharger® Intake System installed

### AIR FILTERS FOR SPORTSTER® MODELS

#### OE REPLACEMENT AIR FILTER FOR 2004-15 SPORTSTER®

DESCRIPTION	PART#
Replaces OE# 29331-04 For 2004-2013 Sportster® Except XL-1200V 72	HD-8834
Replaces OE# 294000-15 For 2012-2016 XL-1200V Sportster® 72 & 2014-2015 Sportster®	HD-1212

PART NUMBER  
HD-8834

PART NUMBER  
HD-1212

#### REPLACEMENT AIR FILTER FOR 2004-15 SPORTSTER® SCREAMIN' EAGLE®

DESCRIPTION	PART#	DRYCHARGER®
Replaces Screamin' Eagle® # 29442-99E	HD-0800	HD-0800DK
Replaces Screamin' Eagle® # 29044-04B	HD-0900	.

#### HD-0900:

- 9 3/8" L X 6" W Oval X 1 7/8" H
- Top plate fits standard mounting pattern for Sportster® Screamin' Eagle® air cleaners

PART NUMBER  
HD-0900

### AIR FILTERS FOR DYNA® MODELS

#### OE REPLACEMENT AIR FILTER FOR 2008-16 DYNA® MODELS

DESCRIPTION	PART#
Replaces OE# 29191-08 Except 2013+ Dyna Street Bob	HD-9608

PART NUMBER  
HD-9608

#### REPLACEMENT AIR FILTER FOR 2008-15 DYNA® SCREAMIN' EAGLE®

DESCRIPTION	PART#
Replaces Screamin' Eagle® # 29385-08	HD-0808

PART NUMBER  
HD-0808

- Unique tear drop metal top plate with centered 5/16" NC weld nut to attach cover
- Three-hole-drilled to fit standard mounting pattern for Dyna® Screamin' Eagle® backplate
- Teardrop molded rubber base

### AIR FILTERS FOR TWIN CAM® AND SOFTAIL® MODELS

#### REPLACEMENT AIR FILTER FOR 1999-07 TWIN CAM® & 2008-15 SOFTAIL® MODELS

DESCRIPTION	PART#
Replaces OE# 29461-99 (most 99-07 Twin Cam® and 99-15 Softail® models)	HD-1499
Replaces OE# 29462-99 (99-01 F/I Twin Cam® models)	HD-8899
Replaces OE# 29314-08 (Cross Bones™/Blackline®/Softail Slim®)	HD-1611

PART NUMBER  
HD-1499

PART NUMBER  
HD-8899

PART NUMBER

HD-1614  
HD-0910

### REPLACEMENT AIR FILTER FOR 2008-16 TOURING MODELS SCREAMIN' EAGLE®

#### DESCRIPTION

Replaces Screamin' Eagle® # 29244-08  
Replaces Screamin' Eagle® Ventilator # 29670-09

#### PART#

HD-0818  
HD-0910

#### DRYCHARGER®

HD-0800DK

- 5 1/2" diameter metal top plate with centered 5/16" NC weld nut to attach cover
- Three-hole drilled to fit standard mounting pattern for Screamin' Eagle® backplate
- 6" diameter molded rubber base

## AIR FILTERS FOR EVO MODELS

### OE REPLACEMENT AIR FILTER FOR 1990-99 EVO MODELS

#### DESCRIPTION

Replaces OE# 2925991A & 2933096

PART NUMBER  
HD-1390

#### PART#

HD-1390

- Fits models with and with out vent lines

### REPLACEMENT AIR FILTER (STRAIGHT ELEMENT) FOR EVO SCREAMIN' EAGLE®

#### DESCRIPTION

2" height (Replaces Screamin' Eagle® # 29055-89)

PART NUMBER  
HD-0600

#### PART#

HD-0600

- 7" diameter metal top has centered 5/16" NC weld nut to attach cover
- Top plate is three-hole drilled to fit standard mounting pattern for EVO air cleaners
- 7" diameter molded rubber base
- Requires stock mounting spacers

## AIR FILTERS FOR OTHER HARLEY-DAVIDSON® MODELS

### OE REPLACEMENT AIR FILTER FOR 2002-16 V-ROD®

#### DESCRIPTION

Replaces OE# 29437-01

PART NUMBER  
HD-1102

#### PART#

HD-1102

### OE REPLACEMENT AIR FILTER FOR 2008-12 HARLEY-DAVIDSON® XR1200™

#### DESCRIPTION

Replaces OE# 29377-08

#### PART#

HD-1208

- 7 3/8"L X 3 3/4"W X 7/8"D panel style air filter
- High-flow cotton media fits directly into the OE air cleaner assembly
- One-piece injection molded urethane sealing bead

PART NUMBER  
HD-1208

### OE REPLACEMENT AIR FILTER FOR 2015 HARLEY-DAVIDSON® XG500/750 STREET

#### DESCRIPTION

Replaces OE# 29400078

#### PART#

HD-4915

- Fits neatly behind the stock air filter cover
- Replaces air filter element and backing plate

PART NUMBER  
HD-4915

# HIGH-FLOW AIR FILTERS™ FOR PERFORMANCE TRACK BIKES

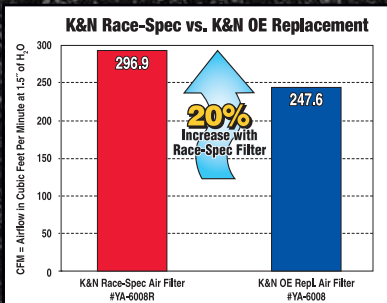

Red Bull/Road Race Factory Yamaha - Jake Gagne

Purpose-built for racing and closed-course track bikes, RACE-SPEC air filters are designed to increase horsepower by delivering extremely low restriction.

- Developed to increase horsepower and acceleration for the race track
- Specially pleated two-ply cotton race filter media
- Fewer pleats than standard K&N® replacement air filters
- Fits directly in OE air box
- Washable and reusable
- K&N® One Year Limited Warranty

**PURPOSE BUILT  
RACE-SPEC  
HIGH-FLOW  
AIR FILTERS™**

Airflow rates shown are estimates based on individual tests of specific air filters. Results will vary.

**Fuel management modifications  
WILL be necessary.**

**These filters are designed for  
closed-course competition use only.**

**\* LEGAL IN CALIFORNIA ONLY FOR RACING VEHICLES WHICH MAY NEVER BE USED, REGISTERED OR LICENSED FOR USE UPON A HIGHWAY.**

See [knfilters.com](http://knfilters.com) for CARB status on each part for a specific vehicle

See page 175 for specifications regarding emissions standards and CARB regulations.

**TWO-LAYER COTTON MEDIA  
WITH FEWER PLEATS**

**SPECIFIC SEALING  
BEAD**

## SPECIALTY CLAMP-ON AIR FILTERS FOR PIT BIKES

K&N® clamp on racing filters provide the added air flow your bike needs for even better performance.

- Pleated media offers a large surface area for low restriction, resulting in improved throttle response
- Constructed with ultra-strong molded pliable rubber flanges to absorb vibration and allow for secure attachment
- Flanges can be stretched up to 1/16" (1.5mm) to fit in between sizes
- K&N® Drycharger® filter wrap available for use in wet conditions or for extended service intervals.

Big Minis - Jack Phinn

Legal in California only for racing vehicles which may never be used, registered or licensed upon a highway.

**PLEATED MEDIA PROVIDES A LARGE SURFACE AREA**

**PLIABLE MOLDED FLANGES ABSORB VIBRATION**

**K&N® DRYCHARGER® INSTALLED**

# HIGH-FLOW AIR FILTERS™

## SPECIALTY CLAMP-ON AIR FILTERS FOR DIRT TRACK RACING

2013 GNC Champion Brad Baker and 2014 GNC Champion Jared Mees

These dirt track air cleaners are large by design to allow extra dirt holding capacity without restricting air flow.

- Constructed with strong molded, pliable rubber flanges that absorb vibration and allow for secure attachment
- The "D" shaped oval filter with a long neck permits clamping onto the velocity stack in such a manner as not to obstruct the airflow to the velocity stack
- K&N® Drycharger® filter wrap available for extended service intervals

**PLIABLE MOLDED FLANGES ABSORB VIBRATION**

**K&N® DRYCHARGER® INSTALLED**

**XSTREAM® SERIES AIR FILTER INSTALLED**

# FLAME ARRESTORS FOR PERSONAL WATERCRAFT

Built for personal watercraft racing, these marine approved flame arrestors are designed to legally increase performance on your PWC.

- Epoxy-coated aluminum wire mesh backfire screen resists corrosion
- Polished stainless steel top plates provide resistance to salt water
- Marine approved and meets US Coast Guard standards
- Use with K&N® Drycharger® filter wrap to limit water from reaching flame arrestor

Macc Racing - Chris MacCluggage

Legal in California only for racing vehicles which may never be used, registered or licensed upon a highway.

## DRYCHARGER® FLAME ARRESTOR WRAPS

The hydrophobic nature of our polyester Drycharger® wraps limits the amount of water that reaches the flame arrestor. K&N® filter wraps are designed to repel water, but will not seal against complete submersion.

***SPECIALTY/  
ACCESSORIES***

## SPECIALTY AIR FILTERS

- Designed to clamp on to different sized intake tubes, velocity stacks, carburetors or throttle bodies
- Many applications available depending on diameter, angle or offset
- Designed to provide added airflow for your bike for increased performance
- Pleated media offers a large surface area, resulting in low restriction and excellent throttle response
- Constructed with ultra-strong molded pliable rubber flanges which absorb vibration and allow for secure attachment

## AIR FILTER WRAPS

- Designed to offer added protection from wet weather, extreme elements and extended service intervals compared to exposed air filters
- Stops small dirt particles yet adds little restriction to the airflow of the filter
- Available in many different sizes and a variety of colors of universal or custom fit applications
- Made from durable, specially treated polyester micro-weave material containing uniform micron openings
- Designed to be run dry and can be cleaned with K&N® PowerKLEEN™
- Double-stitched elastic openings ensure proper fitment

# **SPECIALTY AIR FILTERS**

## **DESIGNED TO INCREASE HORSEPOWER**

### **CARBON FIBER TOP SPECIALTY AIR FILTERS**

Carbon fiber provides incredible strength with minimal weight. Carbon fiber provides 1/3 less weight than conventional filter top construction material. Smooth, glass-like finish provides the ultimate in fit and finish as well as function and performance.

**CARBON FIBER TOP AIR FILTERS HAVE  
PART NUMBERS THAT BEGIN WITH "RP" OR "RF"**

**PRODUCT LISTINGS CAN BE FOUND ON PAGES 152-169**

### **TITANIUM TOP SPECIALTY AIR FILTERS**

When it comes to exotic race materials, titanium is well known for its lightweight and increased strength to weight ratio.

**TITANIUM TOP AIR FILTERS HAVE  
PART NUMBERS THAT BEGIN WITH "RT"**

**PRODUCT LISTINGS CAN BE FOUND ON PAGES 152-169**

### **XSTREAM® TOP SPECIALTY AIR FILTERS**

K&N® patented Xstream® racing air filters take performance to the next level with innovative K&N® airflow technology. Xstream® air filters provide outstanding airflow and increased filtration area over a standard K&N® air filter. Standard tapered or reversed tapered styles available.

K&N® XStream® Series Air Filter. U.S. Patent Number: D401,597

**XSTREAM® TOP AIR FILTERS HAVE  
PART NUMBERS THAT BEGIN WITH "RX"**

**PRODUCT LISTINGS CAN BE FOUND ON PAGES 152-169**

### **INVERTED TOP SPECIALTY AIR FILTERS**

A unique approach to filter design and concept, with a filter top that actually inverts, dropping into the cylinder of the filter. Surface area is greatly increased and designed to provide more filtration than any other comparably sized product. With three color choices, you can now customize your intake.

**INVERTED TOP AIR FILTERS HAVE  
PART NUMBERS THAT BEGIN WITH "RR" OR "RG"**

**PRODUCT LISTINGS CAN BE FOUND ON PAGES 152-169**

These products are not street legal on vehicles with regulated emission control systems unless used as a direct replacement air filter for a street legal intake system

# AIR FILTER WRAPS FOR ADDED PROTECTION

## **PRECHARGER® AIR FILTER WRAPS**

K&N® Prechargers® are a specially designed filter wrap made to extend the service interval of your K&N® air filter when used in very dusty conditions.

- Made from durable polyester micro-weave material containing uniform micron openings
- Stops small dirt particles, yet adds little restriction to the airflow of the filter
- Designed to be run dry and can be cleaned with K&N® filter cleaner
- Double stitched elastic openings assure that the Precharger® will stay in place
- Custom made to fit each application and available in a variety of colors

## **DRYCHARGER® AIR FILTER WRAPS**

K&N® Drychargers® are designed to prevent splashes of water or mud from saturating your K&N® air filter.

- Fits and functions exactly the same as the K&N® Precharger® except for being pre-treated with a proprietary hydrophobic process
- Manufactured from a durable polyester micro-weave material
- Stops small dirt particles, yet adds little restriction to the airflow of the filter
- Please be aware the Drycharger® is water repellent, not waterproof and depending on conditions as well as usage the water repellent treatment is good for 1 to 2 years

## **PRE-CLEANER AIR FILTER WRAPS**

Developed for only the dustiest of conditions, the K&N® pre-cleaner is a specially designed foam filter wrap made to extend the service interval of your K&N® air filter. Made from large, open cell foam, the pre-cleaner will trap dust and dirt, yet add only a small amount of restriction to the airflow of your filter.

- Custom made to fit specific applications
- Also sold in universal cut-to-fit sizes
- Red pre-cleaners are designed to be used with foam filter oil (purchased locally), pre-cleaners must be cleaned with K&N® cleaner or soap and water

# CRANKCASE VENT BREATHERS

## MULTIPLE STYLES AND SIZES AVAILABLE

Steel base crankcase vent filters have vent tubes added to their base. Filters consist of a one piece design with a rubber or chrome top. Filters with mounting studs can be mounted remotely, but require vent hoses and clamps. Filters mounted direct can be pressed into rubber grommets in valve covers. Base plates are chrome plated with zinc tubes.

Rubber base crankcase vent filters are designed to clamp directly to metal or plastic tubing, or to push into rubber breather grommets. Ideal for engines, transmissions, oil and gas tanks on racing vehicles. Metal shields and top plates are chrome plated for beauty and durability.

#62-1090 installed with stud mount

# PERFORMANCE AIR BOX FOR KARTS

Since more & more kart racing organizations like IKF & SKUSA require the use of an air box/silencer, K&N® now offers a high-flow air box specifically built for karting that accommodates an original K&N® washable High-Flow Air Filter™.

- K&N® High-Flow Air Filters™ & kart air box/silencer are ideal for both 2- or 4-cycle karts
- K&N® kart air box encases a 2 1/2" (inside diameter) straight or 20° angled flange High-Flow Air Filter™
- Brass threaded insert built in to the end eases mounting
- Comes equipped with 23mm restrictors but 29mm restrictors are also available
- Approved by most kart racing organizations

Legal in California only for racing vehicles which may never be used, registered or licensed upon a highway.

 Alden Racing - Harry Alden

# HIGH-FLOW AIR FILTERS™ FOR KARTS

Alden Racing - Danny Alden

Clamp-on specialty filters are designed to provide added airflow for your kart.

- Pleated media offers a large surface area for low restriction, resulting in improved throttle response
- Constructed with ultra-strong molded pliable rubber flanges which absorb vibration and allow for secure attachment
- Flanges can be stretched up to 1/16" (1.5mm) to fit in-between sizes
- K&N® Precharger® filter wrap available to extend service intervals

# HIGH-FLOW AIR FILTERS™ FOR AUTOMOBILES

- Designed to increase horsepower and acceleration
- Washable and reusable
- 10-year/million mile limited warranty
- Drops into your factory air box in 5 minutes
- Up to 50,000 miles between cleanings (under normal highway driving conditions)

**HIGH-FLOW WASHABLE  
COTTON MEDIA**

**DURABLE URETHANE OR  
PLASTISOL FRAME**

**DROPS EASILY INTO YOUR  
FACTORY AIR BOX**

## HIGH-FLOW AIR AND OIL FILTERS - Visit [knfilters.com](http://knfilters.com) for additional product listings

# WRENCH-OFF® OIL FILTERS FOR AUTOMOBILES

Falkner Livingston Racing - Micky Dymond

- Welded 1" filter nut eases removal
- High flow and high filtration
- Designed to be compatible with synthetic motor oils
- Heavy duty canister construction
- K&N® Limited Warranty

**WRENCH-OFF**  
PERFORMANCE OIL FILTERS

**PRE-DRILLED NUT FOR  
EASY REMOVAL**

**DURABLE CANISTER  
CONSTRUCTION**

**CARTRIDGE OIL FILTERS  
ALSO AVAILABLE**

**HIGH-FLOW AIR AND OIL FILTERS - Visit [knfilters.com](http://knfilters.com) for additional product listings**

# HEAVY DUTY AIR FILTERS FOR DIESEL TRUCKS AND RVs

Our heavy duty air filters are constructed with extra strength and reinforcements to withstand the harsh conditions that can be found in commercial use. They are specially designed to withstand the extreme temperatures and pressures that can be present in large turbo diesel applications. They are also designed to avoid collapsing or losing their seal under the high levels of compression and air flow encountered in commercial environments.

**DRYFLOW**  
AIR FILTER TECHNOLOGY

## Hybrid Filtration Media

Our Hybrid air filtration media is a non-woven synthetic material designed to be used dry with no oil required. It is comprised of lofted non-woven synthetic fibers, giving the air filter high airflow/low-restriction while providing large dust holding capacities.

## Easy To Clean & Reuse - Uses No Oil

These filters are incredibly easy to clean and nearly indestructible. After you apply our special degreaser, (1 gallon bottle #99-0638), you can use pressure washers, power sprayers, or water hose nozzles to clean the filter.

K&N® truck & trailer coming soon to an event near you

\*S = standard flow. R = Reverse flow. Some air filters are available in both variations. Cross references should be used for comparison of filters with similar dimensions. The user assumes all responsibility for verifying that filters are compatible with their vehicle before using these products. Damage may result if the user fails to ensure that the filter is compatible and seals properly before installing the product or operating the engine. Please call K&N's Customer Service Department at 1-877-AIR-FILTER for assistance when choosing the appropriate replacement air filter.

# HEAVY DUTY WRENCH-OFF® OIL FILTERS

## FOR DIESEL TRUCKS AND RVs

K&N® heavy duty wrench-off® oil filters have been specially designed for the high compression levels and tighter tolerances of turbo diesel engines. Our synthetic micro-glass media provides lower restriction and incredible engine protection. Add to this our thicker canister and higher burst strength and you have one serious heavy duty oil filter.

**WRENCH-OFF**  
PERFORMANCE OIL FILTERS

**STURDY 1" NUT FOR EASY REMOVAL**

**SYNTHETIC MEDIA FOR HIGH DIRT CAPACITY AND FILTRATION EFFICIENCY**

**DICHROMATE PLATED BASE PLATE WITH DOUBLE-ROLLED SEAL**

# AUTHORIZED DEALER PROGRAM

## LET KNFILTERS.COM WORK FOR YOU

Over 1 million unique visitors each month

- Check your dealer listing, get registered, and easily look up products at [knfilters.com](http://knfilters.com)

## THE BENEFITS DON'T STOP AT REFERRALS

- Online and phone referrals direct customers to your store
- Includes new product data and application updates
- Receive a free welcome kit and sales collateral
- Includes sales literature and catalogs, price list, POP materials, banners, window clings and decals

## FREE K&N® WELCOME KIT

- Available for verified powersports dealers that currently sell K&N® products
- Includes a variety of powersports promotional display material and literature to educate your staff and customers on the benefits of K&N® products
- Kit includes K&N® powersports catalogs, sales brochure, audio training CD, mini-brochures, decals, banners and POP displays to help promote K&N® in-store sales

## K&N® AUTHORIZED DEALER DISPLAY

- Proudly displays K&N® performance filters and cleaning supplies
- Centralizes and organizes your K&N® inventory for ease of ordering
- Increases education and traffic to the complete K&N® product line
- Easy to assemble, black powder coated metal construction
- Contact your K&N® representative today to qualify

## K&N® PERFORMANCE FILTERS MAKE YOU MORE PROFIT AND YOUR JOB EASIER TO ACCOMPLISH

If your parts and service departments aren't stocking and servicing K&N® filters across the board and making conscious efforts to push them at each opportunity, you are missing out on valuable profits.

**K&N® Displays and Promotional Materials are Available to Authorized K&N® Dealers with Qualifying Stock of Both K&N® Air and Oil Filters.**

2) Requires Two; 3) Requires Three; 4) Requires Four. The use of custom air filter requires removal of air box. Some custom filters and intakes are not legal for sale or use on any pollution controlled motor vehicle in California or states adopting California emission procedures. See knfilters.com for CARB status on each part for a specific vehicle.

If maximum horsepower is the objective, the selection of the correct filter is of paramount importance. Two factors dictate the ability of the air filter unit to flow the maximum amount of air into the engine, these being the shape and size. With a K&N® air filter, we can take the outside dimensions of the air filter as a means of selecting sufficient area for the air flow required.

Let us deal with shape first. K&N's air flow bench has shown that with typical two and four barrel automotive carburetors, air flow is greater when the diameter of the air filter is large in comparison to its height. This means that an air filter that is 10" in diameter and 2" high, will generally flow more air than an air filter which is 5" in diameter and 4" high. If space permits, you should choose an air filter where the height of the air filter is between 1/5 and 1/4 of the air filter's diameter. Another thing that the air flow bench has shown, is that there are exceptions to every rule. One such exception occurs when an air filter is clamped on a long runner used to feed a throttle body on an electronic fuel injected engine. The straighter the air can enter the tube, the lower the restriction will be. Hence, in order to let the air travel as straight as possible, a filter that has a height of 2 to 4 times its diameter will work best. On single throat carburetors or injector stacks where one air filter per throat is used, a taller air filter can also be used to an advantage. The diameter of the air filter in relation to the throat of the carburetor is important and generally the diameter of the air filter should be at least three times the diameter of the throat of the carburetor. When space does not permit the ideal filter shape, choose a size that will still allow enough airflow for the engine.

Once you have determined the shape of the filter required, the size of the filter must be selected. This is important. A filter that is too small can literally strangle an engine, in addition, if too small of a filter is used, the filtering efficiency drops dramatically due to the excessive speed of the incoming air actually opening up the passages in the cotton gauze. At K&N, we believe a pressure drop of 1.5" of water across the air filter element at maximum power RPM, is the most that should be used for sizing a new air filter.

Two factors dictate filter size: displacement of the engine in cubic centimeters (cc), and the RPM turned at maximum horsepower. The effective area of a filter is the diameter in inches x 3.1416 x the height of the air filter in inches, less .75". The reason we subtract the .75" is because of the rubber seals on the end of the filter, and the fact that very little air flows near them, so this part of the filter is not included.

To determine the minimum size of filter that is required for your application, apply the following formula (table 1):

Let us assume that we will put one filter for each carburetor for a total of 4 filters. The flange of the carburetors should be measured so that the proper size clamp-on filter can be found. In this case each carburetor has a 2 1/16" O.D. flange. The maximum diameter of each air filter should be determined next. The measurement between the centerline of each carburetor will be the maximum diameter possible. Any frame, tubes, or other obstructions may further reduce the diameter possible. For ease of carburetor calibration, always use 4 filters of the same size. So if the measurements are 3.4", 3.7", 3.4", but there is a frame tube that will interfere on the outer carburetors at 1.5", the maximum diameter that all 4 filters can be, is 3.0", because of the frame interference. (table 2).

Now the filter element height can be calculated from the formula (table 3):

Referencing the specialty air filter section will show a couple of choices that will be acceptable for this application. We can use an RU-1880 which is 3" O.D. x 2 1/2" long with a rubber top. RC-1880 has the same dimensions but with a chrome top. And finally there is RC-1890 which has a length of 3" and a chrome top. This would be the best choice if the longer length will fit on the bike, because the service interval will be lengthened.

2) Engine: 1100cc 4 cylinder, 4 stroke motorcycle engine installed in an off-road dune buggy. The redline of the engine is 10,000 RPM (table 4):

In this situation, it would be better to use a single air filter, remotely mounted so that it may be changed easily if necessary. This will require custom fabrication of some tubing duct-work to hook up to the carburetors and allow a single large clamp-on filter to be installed. Let's say we will use 4" O.D. tubing to connect our filter to the carburetors. This will require a filter with a 4" flange. We will use 6" as our O.D. (table 5):

For off-road conditions, the filter should be 1.5 to 2 times the minimum, to allow more surface area for the dirt to build up on. Therefore the filter required will be 3.21-4.28 inches tall. Checking the specialty air filter section, we come up with RE-0870, which is a tapered clamp-on, 6" O.D. on the base and 4 5/8" O.D. on the top, with a filter length of 9" (in off-road air filters, bigger is better).

For a vehicle of any other sort, an air filter element about the size dictated by the formula will probably do the job. The formula will usually give an odd size for an answer. You should always select a larger size. The larger the air filter, the longer you can go before servicing is required.

### CONCLUSIONS

K&N air filters are designed to provide high air flow while at the same time providing the protection needed to ensure long engine life. A walk through the pits at an off-road race will show the numerous K&N filters installed on competitive and class-winning machines. A look at these same filters after the race will show a considerable amount of dirt on the outside of the filter, yet the inside will be as clean as a new filter (provided the filter was serviced and the case was sealed properly), and that's the way it should be. Whether you are racing to win or just driving to work, you can't afford to be without a K&N High-Flow Air Filter™!

Table 2

$$H = \frac{A / \# \text{ of filters}}{D \times 3.14} + .75$$

Plugging in the numbers, we have:

$$H = \frac{15.8 / 4}{3 \times 3.14} + .75 = 1.16''$$

Table 3

$$A = \frac{1100 \times 10,000}{85,381 \times 4} = 32.2 \text{ sq. in.}$$

Table 4

$$H = \frac{26.3 / 1}{2.14''} + .75 = 6 \times 3.14$$

Table 5

$$A = \frac{\text{cc} \times \text{RPM}}{85,381 \times \text{stroke type}}$$

A = effective filtering area  
 cc = cubic centimeter displacement  
 RPM = redline of engine  
 Stroke type = 2 or 4

To find the total height (including the rubber sealing edges) of the filter needed, apply this formula:

$$H = \frac{A / \# \text{ of filters}}{D \times 3.14} + .75$$

D = estimated maximum diameter that will fit unobstructed in the vehicle.  
 H = height of filter

To make things clear, study these two examples:

1) Engine: 600cc 4-cylinder, 4-stroke, with 4 carburetors and a redline of 11,000 rpm, in a street bike.

$$A = \frac{\text{cc} \times \text{RPM}}{85,381 \times \text{stroke type}}$$

Applying the formula for filter area, we have:

$$A = \frac{600 \times 11,000}{85,381 \times 4} = 15.8 \text{ sq. inches}$$

Table 1

# Round Straight

When selecting one of K&N's universal round straight air filters, you should consider the following dimensions as they relate to the specification chart:

(F) Mounting Flange Inside Diameter - This is the most critical dimension and should be very close to the diameter of the application's inlet flange. The flange will stretch up to 1/16" for those in-between sizes.

(D) Filter Diameter - This is the overall diameter of the filter. Always use the largest diameter practical for maximum filtration.

(L) Filter Length - This dimension is the length of the filter body only, it does not include the flange length. Always use the longest filter practical for maximum filtration.

(FA/FL) Flange Angle and/or Length - If no angle is listed in the specifications table, then the flange is straight. Any angle listed is in degrees and can be utilized when space is a problem.

(FO) Flange Offset - In some cases the center of the flange is offset from the center of the filter base in order to provide a better fit.

# Round Tapered

When selecting one of K&N's universal round tapered air filters, you should consider the following dimensions as they relate to the specification chart:

(F) Mounting Flange Inside Diameter - This is the most critical dimension and should be very close to the diameter of the application's inlet flange. The flange will stretch up to 1/16" for those in-between sizes.

(D) Filter Diameter - This is the outside diameter of the filter. Always use the largest diameter practical for maximum filtration.

(L) Filter Length - This dimension is the length of the filter body only, it does not include the flange length. Always use the longest filter practical for maximum filtration.

(FA/FL) Flange Angle and/or Length - If no angle is listed in the specifications table, then the flange is straight. Any angle listed is in degrees and can be utilized when space is a problem.

(FO) Flange Offset - In some cases the center of the flange is offset from the center of the filter base in order to provide a better fit.

# Oval Straight

When selecting one of K&N's universal oval air filters, you should consider the following dimensions as they relate to the specification chart:

(F) Mounting Flange Inside Diameter - This is the most critical dimension and should be very close to the diameter of the application's inlet flange. The flange will stretch up to 1/16" for those in-between sizes.

(MA / SA) Filter Oval Dimensions - This is the length and width of the filter. Always use the largest filter practical to fit the application.

(L) Filter Length - This dimension is the length of the filter body only, it does not include the flange length. Always use the longest filter practical for maximum filtration.

(FA / FL) Flange Angle and/or Length - If no angle is listed in the specifications table, then the flange is straight. Any angle listed is in degrees and can be utilized when space is a problem.

(FO) Flange Offset - In some cases the center of the flange is offset from the center of the filter base in order to provide a better fit.

# K&N® WARRANTY INFORMATION

## CUSTOMER PROTECTION

### CONSUMER PROTECTION PLEDGE

We want to make sure that when you buy a K&N® lifetime air filter or air intake system, you can be confident your vehicle's warranty will not be impacted. We also want you to feel confident that even if you experience difficulties with a dealership repair department, we will step in and resolve the issue, so you won't have to. Therefore, we make the following Pledge:

**K&N® pledges to our customers that they will not be taken advantage of and charged for a repair due to a manufacturer warranty denial blamed on the presence of a K&N® product.**

### 10-YEAR/MILLION MILE LIMITED WARRANTY

K&N O/E Replacement Air Filters and Air Intake Systems purchased from Authorized Dealers are backed by a 10-year/million mile limited warranty when used primarily on paved roads and on vehicles for which they were designed. If one of these products ever fails to provide complete satisfaction, K&N will replace it.

#### WHAT IS NOT COVERED BY OUR WARRANTY

Any K&N product used for 1: any type of racing or competition; 2: any off-road use, custom or modified applications; 3: any off-road or dual sport motorcycle/ATV use; or 4: any illegal highway use, marine, or industrial applications. All K&N Air Filters not covered by our 10-year/million mile limited warranty are warranted against defective materials or workmanship for one year from date of purchase with no mileage limitation. This includes K&N Air Filters sold for ATV's and off-highway or dual-purpose motorcycles.

#### INCORRECT CLEANING OR USE VOIDS WARRANTY

K&N Air Filters should be cleaned every 50,000 miles for normal highway use, more often in dusty conditions. Cleaning should be done with K&N cleaner and air filter oil (or comparable air filter cleaner and oil). Use of compressed air, or chemicals not specifically designed to clean and re-oil cotton air filters (i.e. gasoline, transmission fluid, motor oil, lightweight oil, or diesel fuel) will void the warranty. Any damaged, abused or modified K&N Air Filters will not be warranted.

#### REPLACEMENT

Any K&N product returned to K&N will need a Return Goods Authorization number and must be sent at customers' expense along with proof of purchase. Call 1-800-858-3333 or contact K&N by email or mail.

#### PRODUCT REGISTRATION

Register your warranty at our web site and you'll be eligible for special promotions and product upgrade opportunities.

#### EXTENT OF WARRANTY

Any defective K&N Air Filter properly returned to K&N will be replaced. K&N reserves the right to determine whether the terms of the warranty, set out above, have been properly complied with. In the event that the terms are not complied with, K&N shall be under no obligation to honor this warranty. K&N will not be responsible for any indirect, consequential, special, contingent, or other damages.

### K&N® OIL FILTER WARRANTY

K&N oil filters are warranted to be free from defects in material and workmanship. Any filter proven defective during the engine or equipment manufacturer's or during the oil supplier's recommended service intervals will be replaced at no charge.

In the event of an engine or equipment failure directly caused by a defective K&N oil filter, which was properly installed and changed following the engine or equipment manufacturer's recommended service intervals, K&N Engineering, Inc. will repair the damaged engine or equipment. If a full synthetic or other premium lubricant is used K&N will extend this coverage to the interval specified by the lubricant supplier.

Claims for engine or equipment repairs provided under this warranty must be submitted within 30 days after discovery of damage. K&N Engineering, Inc. reserves the right to examine the engine or equipment and filter to determine the amount of damage and whether it was caused by a defective K&N oil filter.

This warranty gives you specific legal rights. You may have other rights which vary from state to state.

Engine and equipment manufacturer's warranties remain in effect when K&N oil filters are used.

### COMMERCIAL GRADE DIESEL AIR FILTER WARRANTY

K&N commercial grade air filters have a 3-year or 300,000-mile limited warranty. They are meant to be washed and reused multiple times before needing to be replaced.

### ENGINE PROTECTION LIMITED WARRANTY

Unlike many companies, our warranty for O/E replacement air filters and intake systems does extend beyond the replacement of a defective K&N part. For the original purchaser of the product, our warranty covers any engine damage or related costs incurred as a direct result of the use of a properly installed and maintained K&N O/E replacement air filter or intake system on the specific vehicle for which the product was designed to be used by K&N. This includes reasonable vehicle repair costs, sensor replacements, car rental fees or other incidental expenses directly related to an engine problem caused by the failure of a K&N product. Furthermore, we warrant that using our product will not result in a vehicle warranty denial. K&N will not be responsible for any indirect, consequential, special, contingent, or other damages not listed above.

We will promptly reimburse the consumer for the cost of the repair if a service provider denies warranty coverage as a result of a K&N product or claims that a K&N product has caused harm to your engine or vehicle. In order to receive reimbursement, we require each of the following:

1. The consumer must provide a written statement or repair order from the dealership or service provider in which the dealership or service provider blames the problem or warranty denial on a K&N product;
2. The service provider or consumer must provide K&N with all allegedly damaged parts. Many states have laws that require a service provider to retain all parts replaced during a vehicle repair, unless given consent to dispose of the parts by the consumer. K&N will pay the shipping cost to recover these parts; and
3. The consumer must provide proof of purchase of the K&N product along with cooperation in helping us investigate the claim.

Once these steps have been completed, K&N will contact the service provider and collect evidence to support their claim. In the event we are not provided with sufficient evidence, we reserve the right to reject the claim and will use our best efforts to assist in establishing your rights toward the service provider under warranty or other provisions.

**We strive to exceed consumer expectations. Customer service can be reached at 1-800-858-3333.**

# K&N® WARRANTY INFORMATION

## CUSTOMER PROTECTION

### EMISSIONS STANDARDS AND SMOG TEST REQUIREMENTS

K&N offers more 50-state street legal automotive intake systems than any other company. Check the status of the part number for your vehicle in this catalog or on our website and check whether it has a CARB E.O. CARB stands for California Air Resources Board.

In order for an intake system to be legal in California and states with emission standards, the part must receive an exemption in the form of an E.O. number from CARB which is only valid for a specific vehicle and the E.O. must be in or attached to the vehicle. That means a part number can be CARB exempt for some vehicle applications and not others. There is no such thing as "CARB pending". A particular part number on a particular vehicle is either exempt or not. An intake system that does not have a CARB E.O. is not legal for highway use in California and a few other states and will not pass a state regulated emissions test solely due to the absence of an E.O. number. If you still have questions about the legality of a K&N part number on your vehicle, please visit our website or contact customer service at 1-800-858-3333. You can also determine whether CARB exemption is required for a part on your vehicle to be legal in your state by checking with your local or state motor vehicle or emissions agency.

### HORSEPOWER GUARANTEE

#### K&N® AIR INTAKE SYSTEMS ARE GUARANTEED TO INCREASE POWER!

*(Applicable only for Air Intake Systems purchased and installed in the U.S.A.)*

Every K&N air intake system we design has been tested on a chassis dynamometer to establish that it will provide an increase in horsepower to the drive wheels of the vehicle.\* We publish estimated horsepower increases to allow consumers an opportunity to view a real test result for a specific or similar vehicle even though the actual results a consumer will receive will vary depending on such things as the condition of the vehicle, weather, fuel, and other circumstances.

Our horsepower guarantee is simple and straightforward. If you are the original retail purchaser of a K&N intake system, we offer an unconditional 30 day money back guarantee. If you are unhappy with a K&N intake system for any reason, including the horsepower improvement experienced, we will refund 100% of the purchase price and even pay for return shipping to K&N.

If you are not completely satisfied and wish to return your intake, simply call our customer support team in Riverside, California at 800-858-3333 within 30 days of the original purchase. Provide your name, address, contact information, and original purchase price. We will issue a return authorization number to you. We can also send you a shipping label to get the intake returned at no cost to you. Then use the shipping label to return the complete air intake system (including all parts and components) in an undamaged condition (exclusive of ordinary wear and tear and markings from installation) in the original packaging, together with the original proof of purchase, clearly showing the date of purchase and amount paid. Make sure that the shipping label clearly indicates the return authorization number. A check for the refund will be sent, within 30 days of receipt, to the name and address provided.

This guarantee does not apply to any other costs incurred by the original purchaser, including, but not limited to, dynamometer testing, parts and labor for the installation or removal of the air intake system, loss of use, or other incidental costs.

\* Please note that the horsepower rating that a motor vehicle manufacturer advertises is usually measured at the crankshaft of the engine using an engine dynamometer. There is generally a parasitic loss of horsepower between the crankshaft and drive wheels, which is caused by the drivetrain of the vehicle. This means we will often show absolute horsepower numbers that are lower than the vehicle manufacturer since we are measuring the horsepower that reaches the road.

### K&N® ESTIMATED HORSEPOWER GAINS

K&N provides estimated SAE corrected horsepower gains that are based on actual dynamometer testing for a specific or similar vehicle. The actual horsepower increase a consumer will receive will vary depending on such things as vehicle condition, fuel, weather and other circumstances. It would be impractical to test every possible vehicle configuration or year in which a particular engine may be used; therefore, many of our estimates are based upon similar engine/vehicle/year dynamometer testing that we believe to be representational for the vehicle listed.

### K&N® DYNAMOMETER TEST RESULTS

K&N utilizes an inertial dynamometer (dyno) to determine the estimated SAE corrected horsepower of our intakes kits and OE replacement air filters. This type of dyno does not actually measure horsepower, but rather measures acceleration. This measured acceleration is then multiplied by the mass of the drum (a constant mass) to obtain the force being applied to the drum, or in other words, the interface between the vehicle's tires and the dyno drum. Now that the force at this point is known, determining the torque is straightforward. The torque is calculated by multiplying the calculated force by the radius (again a constant) of the dyno's drum.

Now, torque is very simply and mathematically related to horsepower by the following equation:

$$\text{Horsepower} = \text{Torque} \times \text{RPM} / 5,252$$

From this equation, the SAE corrected horsepower can be determined.

According to the above explanation, the only variable being measured by the dyno is the acceleration of the drum. There are no adjustments (calibration) to be made by K&N on either the two-wheel or four-wheel drive dyno. The mass of the drum(s) is determined at the factory before shipping the dynamometers to K&N and the mass of the drum(s) are imbedded into the software. K&N does not have the ability to modify or adjust these values.

Furthermore, there are several factors that can affect the SAE corrected horsepower values as measured by K&N or at any other dyno facility. Some of these factors are:

- Consistency of test parameters
- Tire pressure
- Fuel octane rating
- Vehicle condition
- The atmospheric conditions (dyno correction factors can vary from engine electronic correction factors)

K&N has noticed that SAE corrected horsepower values will vary from day-to-day, while testing the same vehicle, due to the manner in which the vehicle's on-board computer adjusts for varying climate conditions. In other words, if a vehicle is tested at sea level on a sunny and warm day, the dyno will apply a SAE correction factor to adjust the conditions to a standard temperature and pressure (STP) and the vehicle's on-board computer will also apply certain set of operating parameters. If that same vehicle is tested at a high altitude, on a rainy and cold day, the dyno will again adjust to STP while the vehicle may adjust to a different correction factor than it did on the sea level test. Furthermore, some vehicles have required almost a 100 miles be logged on the vehicle in order to allow the on-board computer to reset itself to obtain accurate power readings.

While K&N pays close attention to these many factors, and is patient while performing dyno tests, we are not in the position to scrutinize the many facilities that perform dynamometer testing for the general public. Furthermore, we certainly do not have enough information to make a judgment on the validity of these tests.

# AIR FILTER CLEANING

## RECHARGE YOUR K&N® AIR FILTER

### SERVICING YOUR K&N® AIR FILTER IS SIMPLE - JUST FOLLOW THE 4 EASY STEPS BELOW

#### STEP 1: APPLY CLEANER

Liberally spray K&N® air filter cleaner or K&N® Power Kleen™ onto both sides of filter and allow to soak for 10 minutes to loosen the dirt. Do not allow cleaner to dry on air filter.

#### STEP 2: RINSE FILTER

Rinse off air filter with cool low-pressure water from the clean side out in order to flush the dirt out of the filter. Continue to rinse the filter until all traces of cleaner are gone. It may be necessary to repeat steps 1 and 2.

#### STEP 3: DRY FILTER

After rinsing, gently shake off excess water and allow filter to dry naturally. Do not oil until the filter is dry.

#### STEP 4: OIL FILTER

**SQUEEZE OIL (99-5050):** Apply K&N® air filter oil evenly along the crown of each filter pleat. Allow oil to wick for approximately 20 minutes. Touch up any light areas on either side of the filter until there is a uniform red color on all areas.

**AEROSOL OIL (99-5000):** Spray K&N® air filter oil evenly along the crown of each filter pleat holding nozzle about 3" away. Allow oil to wick for approximately 20 minutes. Touch up any light areas on either side of the filter until there is a uniform red color on all areas.

*The above process is the only approved procedure for maintaining your oiled cotton K&N® air filter. Visit [knfilters.com](http://knfilters.com) for additional information on cleaning and re-oiling your filter and examples of a dirty filter needing to be serviced.*

# CLEANING SUPPLIES

## RECHARGE YOUR K&N® AIR FILTER

### K&N® POWER KLEEN® INDUSTRIAL STRENGTH CLEANER

	PART#
32 oz. trigger sprayer	99-0621
1 gallon bottle with trigger sprayer	99-0635
12 fl. oz. squirt bottle	99-0606
5 gallon pail	99-0640

### POWER KLEEN™ CLEANER/DEGREASER

K&N® Power Kleen® is the only cleaner recommended to clean K&N® air filter elements. The use of any other cleaning solution can void the filter's warranty, and quite possibly could damage your engine and the filter's cotton material. K&N® Power Kleen® works to dissolve dirt build up and old filter oil and can be washed away with water. It is now formulated to clean those troublesome and demanding cleaning jobs around your garage as well. It is environmentally friendly and specially formulated to remove oil, lubricants, grease, grime, and other deposits from most surfaces including cotton air filters, painted surfaces, chrome, plastic and more!

### RECHARGER® FILTER SERVICE KIT (AEROSOL)

Designed to recharge any K&N® oiled cotton air filter. It restores airflow efficiency so your air filter performs virtually like new!

6 1/2 oz. spray oil, 12 oz. filter cleaner and service decal **99-5000**

### DRYFLOW® AIR FILTER CLEANER

Specially formulated cleaner to be used on K&N® heavy duty commercial grade air filters and NEW Blackhawk Induction™ intake system air filters.

32 oz. trigger sprayer **99-0624**  
1 gallon bottle with 38-inch hose & spray nozzle **99-0638**

### FILTER SEALING GREASE

K&N® air filter sealing grease provides an air tight fit around sealing surfaces on all types of air filter elements. It resists heat and will not melt or run off. **(not to be used on clamp-on filter elements)**

6 oz. squeeze tube **99-0704**  
1 oz. squeeze tube **99-0703-1**

### RECHARGER® FILTER SERVICE KIT (SQUEEZE)

Same as 99-5000 except has squeeze oil bottle instead of spray can.

8 oz. squeeze oil, 12 oz. filter cleaner and service decal **99-5050**

### AIR FILTER OIL

K&N® air filter oil is the only oil specially formulated to work in combination with the cotton fabric in K&N® air filter elements providing outstanding air filtration. When used as directed, it quickly penetrates the filter pleats, where it remains suspended in the cotton fabric until the element is cleaned with K&N® air filter cleaner.

6 1/2 oz. aerosol can **99-0504**  
12 oz. aerosol can **99-0516**  
8 oz. squeeze bottle **99-0533**  
1/2 oz. pillow pack **99-11312**  
1 gallon refill bottle **99-0551**  
5 gallon pail **99-0555**
